

Mesiniaga profit higher

KUALA LUMPUR: Mesiniaga Bhd, a leading information and communications technology (ICT) solutions provider, has increased revenue by 11% to RM331mil and profit by 8% to RM25.3mil in its financial year 2005.

In a statement, the company attributed the strong performance to several major account wins in the second half of 2005.

It said the growth was also fuelled by seeking new opportunities in several key industries such as the public sector, oil and gas, manufacturing, financial services, telecommunications and education.

Mesiniaga's chief executive officer Wan Fusil Wan Mahmood (pic) said the implementation of new internal organisational strategies played a

pivotal role in transforming the company to become more efficient and faster to market.

According to him, it is the combination of aggressive outlook and dynamic

organisational changes that propelled Mesiniaga to perform better last year.

"We develop more aggressive marketing strategies and embarked on a journey of

company-wide revitalisation. These have already reaped rewards for us and we will continue with these initiatives to further strengthen our fundamentals and competitive positioning," he said.

Wan Fusil said with a strong order book, a comprehensive and expanding suite of solutions, and partnerships with key global technology providers, Mesiniaga expects to deliver another positive performance this year.

"In 2006, strategies are in place to accelerate growth through human resource development,

improved sales delivery model as well as investment into research and development and valuedriven business solutions," he added. - Bernama
